Laura,

Kerry and I got START to ramp up to help process data for Joyel.

I like the scenario and questions. I will be back there in 20 minutes if we want to pow-wow.

Attached are 2 maps I found on Paul's website. Are they sufficient are do you require more/new ones?

M

**Subject:** Scenario Interview Questions

Gentlemen,

I've tried to develop a single scenario for our face-to-face interviews. I am 100 percent open to modifications to either the initial scenario (I), the scenario build-up (II thru VI), or the questions. My biggest push is to get an expeditious review as I still need to run these by David and Sandy (and incorporate revisions) before our first interview tomorrow at 1 pm. I am also available to meet over lunch today if that would be helpful. Just let me know. Thank you!!!
